

Tamar Rubin

Enthusiastic Web Developer with a passion for problem-solving, a great relationship with deadlines, and high levels of creativity seeking an opportunity to deliver solid performance combined with strong work ethics and exceptional teamwork.

EDUCATION

Web development program – Practicum100(by Yandex & Masterschool — 02 2022 - 11 2022)

A ten-month intensive online program, providing tools and practices to become a Web developer.

Coursework Includes HTML, CSS, JavaScript, React/Redux, MongoDB, NodeJS, and mastering Git.

In the program, I successfully developed projects of increasing difficulty such as

- **React around api full** - A fully functioning React social media app, where users can sign up, log in, and share cards with images from their travels, with the ability to like and delete cards.
In addition, users can edit their info and avatar using forms with validation.

As well as a rest API fully deployed with a google cloud remote server.

Tools I used: JSX, React hooks, CSS, responsive layout, Custom form validation, ES6 classes, promises, Mongoose database, backside form validation, and a Router.
- **News explorer frontend** -React app responsive for searching and saving news articles where users can signup, login, search for news with keywords, save articles to their profile page, and remove them.
(check out the backend in the repo - “news-explorer-api”)

EXPERIENCE

11.22-date **Limestone Valley Estate** — *web developer & designer.*

Developing and designing a landing page (+two extra pages) for a lavender farm in Timaru, New Zealand.

The website was designed with the client going through every step of the process to suit their needs best as a business

Tools I used: Figma, HTML, CSS, JavaScript, and Responsive layout.

2018-date **Reef Diving and Surfing Centre, Herzelia, Israel** — *Manager of client registration (remote)*

A key role in customer registration, which was suggested by me to my employers, with the idea of improving office workflow and productivity.

The role mainly includes working with forms and bettering them.

Administrative Manager(office-based)

Daily tasks included: customer service - face to face and on the phone, employees leading and management - surfing and diving instructors' timetables, organizing tasks for office admins, and building shift schedules for the office. Training and supporting new employees.

Keeping up communications between the needs of the fieldwork happening outside and their needs and administrative needs and customer expectations. working in a fast-paced environment that requires creative problem-solving teamwork and attention to detail.

PROJECTS

Natours - super interactive landing page I developed outside of my main program in my own time using: Html, CSS, Scss, animation, and responsive layout.
